About Me

- A person who has been dedicated to programming since 2017.
- Motivated to acquire new knowledge.

Education

The Game Assembly | Higher Vocational Education

2024 – Ongoing

Acquired Game Applicable Programming Knowledge

- Further solidified my programming capabilities with C++ by working with an in-house game engine, learning various fields of programming: networking, DirectX11 & HLSL, entity patterns (AI), tool development, and making a visual scripting framework.
- 7 Game Projects were completed through cross-disciplinary collaboration (15~ people). The first two in Unity (C#) and the subsequent ones were in C++ with an in-house engine. Version control was handled with Perforce and tracking was done in YouTrack using an AGILE workflow.

Åva Gymnasium | Upper Secondary School

2020 – 2023

Acquired Full-Stack Web Development and Programming Fundamentals

- Strengthened fundamental knowledge in programming: Python, HTML, CSS, JavaScript, PHP, and SQL (MySQL).

Competencies

- C++
- JavaScript
- CSS
- HTML
- PHP
- SQL
- Unity
- C#
- DirectX 11
- OpenGL/WebGL

Languages

- Swedish (Native)
- English (Fluent)
- Mandarin Chinese (Beginner)
